DETAILED ACTION

Election/Restriction

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

-**species I** corresponding to an embodiment described in figure 2 and paragraphs [0029] to [0036] of the specification, and claims 1-12, 26, and 29; and

-**species II** corresponding to an embodiment described figure 3 and paragraphs [0037] to [0042] of the specification, and claims 13-24, 27, and 30.

2. The species I-II are distinct because they are directed to a related inventions. That is, species I-II as defined by claims 1-24, 26-27, and 29-30 have material different designs and modes of operation (i.e., parameter generator 250 included in encoder 200 of figure 2 comprises a processor 254 and an image compressor 252 [note that encoder 200 of figure 2 comprises two image compressors depicted at 252 and 205] while parameter generator 350 included in encoder 300 of figure 3 comprises only a processor 354). See MPEP 806(j).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 25 and 28 are generic claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 2624

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention/species, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
